deWILDE'S RHODO-LAKE NURSERIES

BRIDGETON, R.D. 1, NEW JERSEY

RHODODENDRONS
AZALEAS AND
ERICACEOUS PLANTS

WELCOME

Our nursery is located just off Route 49 between Salem and Bridgeton at Marlboro in Salem County. We are 40 miles south of Philadelphia and 20 miles from the Delaware Memorial Bridge. Take Exit 1 off the New Jersey Turnpike and follow Route 49 through Salem. See map on back cover.

All stock is nursery grown. We do no collecting, and grow no collected stock. Prices are B&B except as noted. Two-year liners are sold with soil ball wrapped in paper.

Varieties marked (*) are not being grown at present but are included in the list to illustrate our experience with them in former years.

discolor hybrids—(Slocock)

Colors: white, pale pink; pink with dark center. These have proved fairly hardy (b) if planted under about 50% shade. They are slow to begin blooming, but have very large florets and trusses. Their blooming time is after the late Catawbiense hybrids. They have been used successfully in the Philadelphia suburban areas.

Grafted plants of our best selection (a pink with a dark center) now available at same prices as other named hybrid varieties.

discolor hybrids—(Dexter) B.C.-b

Colors almost all pale pink. Flowers somewhat smaller than above but appear to bloom sooner and may be somewhat hardier.

Fortunei hybrids B.C.-b.d.

These vary considerably but some are very worthwhile. The best one we have is Gloxineum (see list), one of Dexter's seedlings. Some clones have a fine fragrance, but oddly enough, this occurs in the lighter colored flowers.
